Subject: New buildings are El Camino and 3rd

Jessica,

We just saw the plans for the 3 new buildings at El Camino and 3rd. Our reaction is simply "are you kidding me!" According to the plans, there is a total of 39 parking spaces for the 3 buildings and those, I am sure are for the residents of the one building with the parking spaces.

The garage at 2nd and El Camino fills up every day (except Friday) by 10, 10:30 at the latest. Where are you going to put a couple of hundred new cars? Do you expect everyone to take Caltrain or are they all going to live in the 33 new units.

Right now office workers can only park in the 10 hour spots. If we use a 4 hour spot we have to move the car and if our "tire is marked" we can still get a ticket if we re-park and pay in another 4 hour spot. Yes, that is true, we have had it happen, I don't care what you parking enforcement people say. And that doesn't account for the loss in productivity as people search for another spot in the middle of the day rather than work.

We try to be good citizens here in San Mateo. We put in free, yes free, Electric Charging stations on our building, anyone can use them when we are not there 6pm to 8am (M-F) and All-day Sat and Sun. We have 1/4 of our staff use CalTrain. We purchase our parking permits one-at-a-time instead of bulk so that everyone has a chance. We park in the El Camino and 2nd lot and for our money we get to walk up the stairs with dog poop on them, to the 5th floor that only has one light working, where we pass the pot smokers and the graffiti and the broken glass from yet another car that has been broken into. We've had two of our employees cars broken into, total take - one pair of \$9 sun glasses. Maybe a camera or two would be useful. Raise the fee by \$10/qtr that should cover it. I'd pay for a safer place.

Unless there is some solution coming for parking, these buildings will only make the parking situation much worse. If the goal is to force all us "up-stairs" people from downtown, then this will certainly help.

Subject: Three Projects on S. El Camino Real and 3rd Avenue Intersection: Citizen Feedback
Date: Friday, November 07, 2014 3:16:15 PM

Hello,

This is an abbreviated copy of the letter we sent to the San Mateo City Manager in regard to the "Three Corners" project.

With this project, San Mateo has an opportunity to blend art, architecture and practicality by including solar panels in the structures chosen for the site. Every community should be looking for ways to use alternative energy sources as part of their long-term planning. The energy generated by the panels could be used to power streetlights, local businesses and services, nonprofits, Mills Urgent Care, and art installations.

Solar panels could be designed as part of whatever structures are ultimately built at the site, rather than as an afterthought or retrofit. Local solar businesses, such as SolarCity, could be approached as possible partners/vendors, and asked to give the City a good deal on the cost in return for the exposure and PR generated by their name on the site during and possibly after construction.

Recently David Chiu, President of the San Francisco Board of Supervisors, introduced a resolution mandating that all new SF buildings include solar panels, rooftop gardens, or both. This is a trend whose time has come, and San Mateo is poised to show off what it can do towards sustainability.

Sincerely,

Susan Shankle

We live at 33 Arroyo Court & own the properties at 33-35 & at 43-45 Arroyo Court. Unfortunately, we are unable to attend the Neighborhood Meeting on November 18. The development of this blighted intersection is most welcome. Our concern is that there be ample parking for Buildings 1 & 2 as depicted in the Public Notice and urge the Planning Commission to address this critical issue. We look forward to attending the Study Session on December 9.
Respectfully yours, Brenda and Jim Sell

Hello,

As a long-time 15-year resident of the Baywood neighborhood of San Mateo, I am very happy to see this vacant parcel being developed. It appears to be a thoughtful plan and design.

However, we have a very serious lack of parking in downtown San Mateo to accommodate the many and expanding office buildings. Our neighborhood has suffered for years with office workers' cars parked all day long on our residential streets. Residential streets aren't a solution for downtown parking issues.

This development must include additional parking spaces for the businesses that will lease space in the new building. They should be required to devise an underground solution.

Thank you,
Jennifer Barrett

Subject: Three Projects comments.
Date: Wednesday, November 19, 2014 4:45:07 PM

Hello, Simon and Gavin.

Here are my comments from the Three Projects meeting last evening:

- 1) Signage should be appropriate for gateway buildings, meaning they should be minimal in size with non-garish lighting and placed tastefully on the facade.
- 2) Ground floor retail spaces should be occupied by enterprises which would not detract from the gateway nature of the projects. For example, bars or nightclubs would be inappropriate and could lead to trash, beer bottles and loitering at the gateway intersection and reflect poorly on the image of the city and its neighborhoods.
- 3) Lighting in, on and around the buildings should be appropriate for gateway buildings and not attract undue attention to the intersection. Lighting should be subdued and conservative. For example, large spotlights and flashing lights would be inappropriate.
- 4) Existing trees near the projects should not be negatively impacted due to building construction.
- 5) Sidewalks should be kept cleaner than otherwise required since these are gateway projects.
- 6) Owners should be required to take special actions to maintain the appearance and upkeep of the properties in the event retail, office or residential spaces go unfilled. Having vacant buildings is almost as bad as having vacant properties.

Ron, thanks for holding this meeting.....it was needed.....and you did a good job as moderator.

George, it was nice to see you again (we first met at the Ideas for Downtown meeting at the Italian-American Club).

Thank you.

Subject. The Three Corners at 3rd + El Camino

Srs.

I can't believe what I am seeing for the corners, after receiving photos as presented.

They are to Box. Square Cold looking, no imagination just another Cookie Cutter type!

The developers must do better They must make a big statement to the entrance to our downtown

we have waited so many years for this to happen, that just pitting up a lot of squares on top of each other is 2ND class planning.

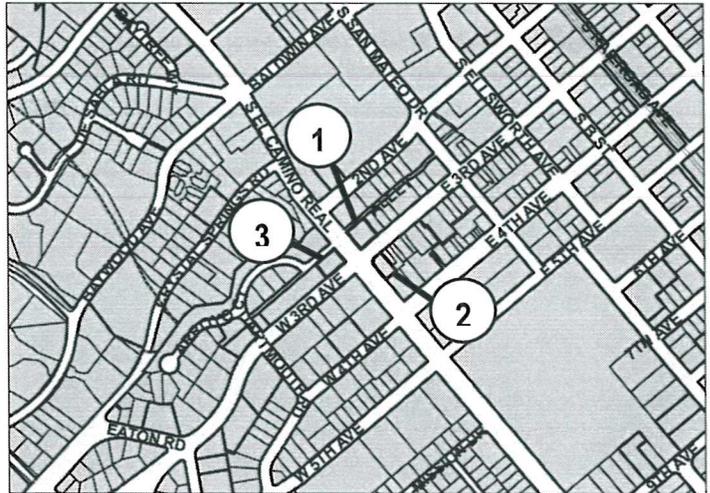

Very truly
