Street Sweeping Program Improvements

Informational Meeting Notice

Improvements to Street Sweeping Program

By 2022, the San Francisco Bay Regional Water Quality Control Board will require the City of San Mateo to prevent all trash from entering the bay through the storm sewer system. The City's street sweeping program helps to meet this goal by picking up trash from the street before it can be washed into the bay.

Staff will be adjusting the sweeping routes and frequency to match the trash generated on each street. This will allow the City to clean high trash generation areas to meet these requirements. Some additional parking restriction signs will also be added on high-generation streets to ensure that the street is clear for sweeping, and this could impact parking in your area.

These route and signage changes will be implemented by the end of 2017. The City invites you to attend an upcoming informational meeting to learn more about these program improvements:

**Thursday, August 24, 2017
from 7:00-8:00PM**

San Mateo Main Library, Oak Room
55 W 3rd Ave, San Mateo, CA 94401

**Thursday, September 7, 2017
from 7:00-8:00PM**

City Hall, City Council Chambers
330 W 20th Ave, San Mateo, CA 94403

You can also view maps and learn more about the changes at this website:
