

FIRM
FLOOD INSURANCE RATE MAPCITY OF
SAN MATEO,
CALIFORNIA
SAN MATEO COUNTY

Federal Emergency Management Agency

LEGEND

To obtain more detailed information in areas where Base Flood Elevations (BFEs) and/or floodways have been determined, users are encouraged to consult the Flood Insurance Rate Map Data tables contained with the Flood Insurance Study (FIS) that accompanies this FIRM. Users should be aware that BFEs shown on the FIS are not necessarily the same as those shown on this map and may not exactly reflect the flood elevation data presented in the FIS. For construction and/or floodplain management purposes, users are strongly encouraged to use the elevations presented in the FIS in conjunction with the data shown on the FIRM.

Elevation Reference Marks (ERMs) elevations listed on this map were obtained and/or developed to establish vertical control for determination of flood elevations. ERM elevations are not necessarily the same as BFEs. Users should be aware that these ERM elevations may have changed since the FIRM was developed. For more detailed information on National Geodetic Survey (NGS) ERMs shown on this map, please contact the Information Services Branch of the NGS at (301) 961-4246. For more detailed information on non-NGS ERMs, users should seek verification of non-NGS ERM monument elevations when using these elevations for construction or floodplain management purposes.

Coastal BFEs are not to apply to areas of 0.7 meters (2.3 feet) or greater elevation above Mean Sea Level (MSL). Users of this FIRM should be aware that coastal flood elevations are also provided in the Summary of Shallow Water Elevation Data table for the community and the community. Elevations shown in the Summary of Shallow Water Elevation table should be used for construction, and/or floodplain management purposes when they are higher than the elevations shown on this FIRM.

Panel No. 0603280001 B

Panel No. 0603280003 B

NOTES

This map is for use in administering the National Flood Insurance Program; it does not necessarily identify all areas subject to flooding, particularly from local drainage sources of small size, or all pluvimetric features outside Special Flood Hazard Areas. Further information may be required and should be consulted for more detailed data on BFEs, and for any information on floodway delineations, prior to use of this map for property purchase or construction purposes.

Areas of Special Flood Hazard (100-year flood) include Zones A, AE, A1-A30, AH, AO, A99, V, VE, and V1-V6.

Certain areas not in Special Flood Hazard Areas may be protected by flood control structures.

Boundaries of the floodways were computed at cross sections and interpreted between cross sections. The floodways were based on hydraulic computations, with regard to requirements of the Federal Emergency Management Agency.

Floodway widths in some areas may be too narrow to show to scale. Refer to Floodway Data Table where floodway width is shown at 1/20 inch.

Corporate limits shown are current as of the date of this map. The user should contact appropriate community officials to determine if corporate limits have changed subsequent to the issuance of this map.

For adjoining panels, see separately printed Map Index.

San Mateo, California 94403
(is available for reference only, not for distribution.)

INITIAL IDENTIFICATION:
OCTOBER 19, 2001

FLOOD HAZARD BOUNDARY MAP REVISION:

FLOOD INSURANCE RATE MAP EFFECTIVE:
OCTOBER 19, 2001

FLOOD INSURANCE RATE MAP REVISIONS:

Refer to the FLOOD INSURANCE RATE MAP EFFECTIVE DATE shown on this map to determine when actual rates apply to structures in the zones where elevations or depths have been established.

To determine if flood insurance is available in this community, contact your insurance agent or call the National Flood Insurance Program at (800) 638-6620.

LEGEND

SPECIAL FLOOD HAZARD AREAS INUNDATED BY 100-YEAR FLOOD

ZONE A No base flood elevations determined.

ZONE AH Flood depths of 1 to 3 feet usually areas of ponding; base flood elevations determined.

ZONE AO Flood depths of 1 to 3 feet (usually sheet flow along slopes) and average depths determined. For areas of alluvial fan flooding; base flood elevations determined.

ZONE A99 To be protected from 100-year flood by Federal flood protection system under construction; no base flood elevations determined.

ZONE V Coastal flood with velocity hazard (wave action); no base flood elevations determined.

ZONE VE Coastal flood with velocity hazard (wave action); base flood elevations determined.

FLOODWAY AREAS IN ZONE AE

OTHER FLOOD AREAS

ZONE X Areas of 500-year flood; areas of 100-year flood with average depths less than 1 foot or with drainage areas less than 1 square mile; and areas protected by levees from 100-year flood.

OTHER AREAS

ZONE X Areas determined to be outside 500-year floodplain.

ZONE D Areas in which flood hazards are undetermined.

UNDEVELOPED COASTAL BARRIERS

Identified 1983 Identified 1990 Otherwise Protected Areas

Coastal barrier areas are normally located within or adjacent to special flood hazard areas.

Hoodplain Boundary

Floodway Boundary

Zone D Boundary

Boundary Dividing Special Flood Hazard Zones, and Boundary Dividing Areas of Different Coastal Base Flood Elevations Within Special Flood Hazard Zones.

Base Flood Elevation Line; Elevation in Feet*

Cross Section Line

Base Flood Elevation in Feet Where Uniform Within Zone*

Elevation Reference Mark

River Mile

*Referenced to the National Geodetic Vertical Datum of 1929
