

# NOTICE OF CONTRACT AWARD

June 18, 2020

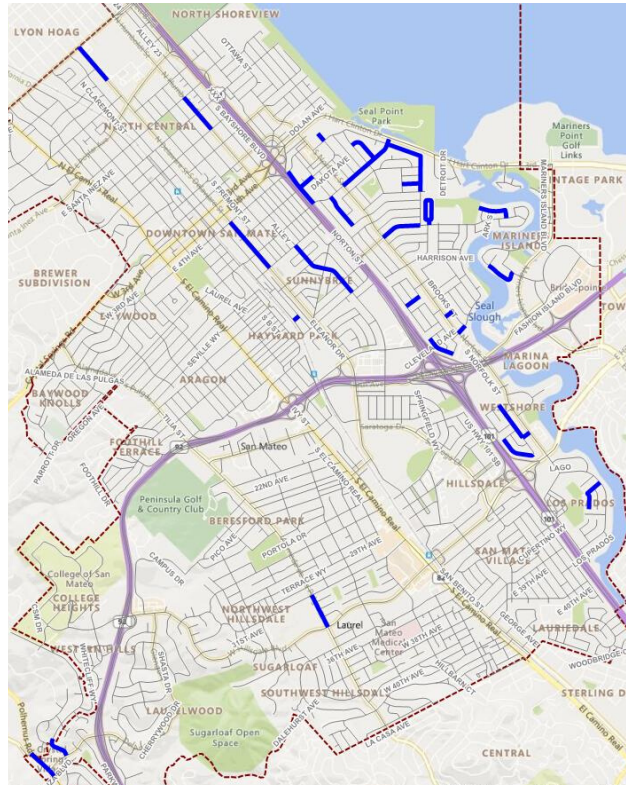

**A project to improve a street near you will start soon.**

The Citywide Slurry Seal Package 1-A was approved by San Mateo City Council on June 15, 2020 and **Valley Slurry Seal International Inc.** was awarded the construction contract.

## What is Slurry Seal?

Slurry Seal is a cold-mix pavement resurfacing that extends the life of road segments. The material used to create slurry are aggregate, asphalt emulsion and fillers that are applied to the road.

## PROJECT OVERVIEW:

The Citywide Slurry Seal Package 1-A project will slurry seal twenty-eight (28) street segments -- blue lines on the map -- to improve the longevity of the roadway. Improved pavement marking, striping, and traffic sign installation are included in the project. The construction work includes base repair, where relevant, during preparation for the slurry seal application.

## ANTICIPATED SCHEDULE:

This project is expected to start in July 2020 and expected to conclude in October 2020. The work is done in phases for each segment.

You will receive a "Notice of Construction" in advance of work start. Please note that construction schedules can change. We thank you for your patience and cooperation.

# NOTICE OF CONTRACT AWARD

An improvement project in your neighborhood has been approved by City Council and the construction contract has been awarded. *See the reverse of this card for details on your neighborhood's upcoming improvements.*

The City of San Mateo Public Works Department ensures your infrastructure is efficient and sustainable for generations to come. Below are just some of the types of projects Public Works prioritizes:

### ROAD IMPROVEMENT

The maintenance and repair of our city's network of roads improves the quality of life for our residents and their visitors. These projects can be pavement reconstruction, slurry seal or roadway rebuilding.

### TRAFFIC FLOW IMPROVEMENT

Traffic flow is an essential element to safety in our communities. These projects can include dedicated turn lanes, intersection redesign, speed bumps installation or a new traffic signal.

### ACCESSIBILITY FOR ALL

The accessibility of our neighborhoods for all improves the health of our city for every citizen. These projects can include new or enhanced bike paths, sidewalks redesign, park trails and crosswalk improvements.

### STORMWATER MANAGEMENT

To decrease polluted stormwater flows into the San Francisco Bay, we work on flood zone improvements and Green Infrastructure design to ensure a healthy environment for all.
